CORE COMPETENCIES

Technical

- Web Dev/Design:
HTML, PyQt, Streamlit, WordPress, Wix
- Programming Languages:
Python (NumPy, Pandas, Scikit-learn, TensorFlow, Object Detection)
- Data Management & DB:
Data Analysis, Data Modeling, MySQL
- Machine Learning:
Computer Vision, Deep Learning
- AI Tools & Platforms:
GPT, Vision, APIs

General

- Microsoft Office, document works.
- Values: Honest, Kind, Trustable. Generous and wonderful expatriat support.

QUALIFICATIONS

Master of Data Science

City, University of London, UK (2017)

Bachelors of Material Engineering.

Seoul National University, Korea. (2010)

Digital Government & International Development Specialist, NIA (2024)

ACTIVITIES

- Interests: Water sports, Expat Meetups
- Societies: Irish Associations of Korea, Seoul Gaels, Seoul Flyers, SeoulShare, YSEM, PLUR.

SUMMARY

AI specialist with 17 years of experience for generating and operating AI projects with kindness, honesty, truth, communication and collaboration with expatriates in Seoul.

EXPERIENCES

Lecturer | *Kookmin University, Samsung Multicampus, ESTSoft, ModuAI*

2022 – Current

- Designed and implemented an accessible coding methodology, significantly reducing the learning curve and facilitating software programming for beginner students. Taught 119 students in 2023 (Satisfaction: 4.83 / 5.0).
- Developed and delivered a comprehensive course curriculum focused on practical software development and implementation, directly preparing students for talent development and real-world business applications.
- Engineered and deployed a dating counselling chatbot leveraging modern messenger platforms and GPT (Generative Pre-trained Transformers), demonstrating advanced NLP and conversational AI capabilities.

IT Specialist | *Sobetec, ITeyes, Corporate & Banking*

2018 – 2021

- Participated in the full lifecycle development and delivery of AI-powered ERP systems for major clients, including KDB Bank and major media enterprise clients.
- Implemented AI-based financial data assessment systems, enhancing predictive capabilities and decision-making for banking operations.
- Developed and integrated advanced video archive systems within ERP solutions, improving data retrieval and content management efficiency.
- Successfully designed, built, and presented an AI loan ERP system for KDB bank, utilizing sophisticated machine learning algorithms and comprehensive data analysis to optimize lending processes.

Project Developer | *KCM*

2014

- Successfully supported and executed a key project, providing full administrative and technical support functions to meet strategic organizational goals.

PROFESSIONAL EXPERIENCE & PROJECTS

Key Projects (2010 – Current)

- (2025.02–2025.06) Automated Personal Information De-Identification System
- (2021.09–2021.12) Implementation of an AI Loan Assessment Automation System (Sobetec)
- (2017.11) TV Show Rating Prediction by Machine Learning Methods with Quantisation of Reviews (City University of London)
- (2017.09) Time Series Prediction with Fourier Analysis (MSc Project, City University of London)
- (2010.03–2010.08) TV Sales Revenue Optimisation System (KOBACO)

Lectures & Teaching (2021 – Current)

- AI Cybersecurity: Personal Data Anonymization, ESTSoft (2025)
- Data Engineering / Data Structure / Intro to Big Data, Kookmin University (2022–2023)
